General market comment

Overview

Global equities ended 2023 on a positive note, despite the Emerging markets' 10% return was underwhelming compared lingering geopolitical headwinds and fears of recession. Major global indices saw impressive double-digit returns, supported by the slowdown in global inflation, a drop in the dollar index. falling energy prices and increased expectations of interest rate cuts by the US Federal Reserve and other central banks. A year ago, many economists expected a mild recession in the US, a deeper recession in the eurozone and a rebound in China. The outcome in 2023 was quite the opposite, with the West avoiding recession and the US economy faring much stronger than expected, Europe handling the economic slowdown better than anticipated, while China, contrary to expectations, struggled to regain growth following the pandemic. In the latest economic outlook IMF forecasts 3% global GDP growth, a notable improvement from 2.7% projected a year ago, while the estimate for 2024 was just marginally reduced by 0.1% to 2.9%. US GDP is expected to have grown by a strong 2.1% in 2023, albeit slowing to 1.5% in 2024. The eurozone, on the other hand, is expected to rebound in 2024 to 1.2% growth from a sluggish 0.7% in 2023.

A clear positive trend in 2023 was inflation moving back towards central bank target ranges, reaching an annual rate of 3.4% in December in the US and 2.9% in the eurozone. Moreover, major central banks have managed to bring inflation down close to their targets without an increase in unemployment. Consequently, the Fed's tightening cycle appears to be coming to an end, with the first rate cuts priced in by the market as early as H1 2024, with the ECB expected to lag a little. Interestingly, some of the emerging markets with the highest inflation rates, such as Poland, Czechia, Hungary and Brazil, have been well ahead of the rate cycle and already began cutting rates in 2023. The IMF expects Chinese GDP growth to stabilise at 5% in 2023 and 4.2% in 2024, somewhat lower than expected last year. China's economic challenges, including a struggling real estate sector, overleveraged local governments and subdued consumer sentiment, have been exacerbated by geopolitical tensions with Taiwan. While policy measures are expected to bring modest growth recovery by the second half of 2024, the focus on higherend manufacturing, including renewable energy products and electric vehicles, is seen as the next growth driver. The long-term growth outlook for China is anticipated to be around 4% a year, reflecting a shift from the 5–6% growth rates seen in the past, as its economy needs to transition away from an investment-led growth model.

Developed markets outperformed emerging markets amid ongoing concerns over China. The MSCI DM index was up by 23.8% for 2023, driven by the stellar performance of US tech stocks as the NASDAQ index surged 55% in the period. The US market was buoyed by the strong economy and declining inflation, with expectations that interest rate cuts may be approaching. Strength in tech mega caps came from AI-related names, as artificial intelligence boosted optimism about further growth in the tech sector and AI supported productivity gains for GDP. European stock markets also performed well in 2023, ending the year with a 23.4% return and a strong rebound from lows in March, when global markets were rattled by the collapse of US mid-sized lender Silicon Valley Bank and the near collapse of Swiss lender Credit Suisse. On a global sector basis, all industries ended the year with a positive performance and there was a reversal of last year's trends, with 2022's laggards recording the best performance. Technology stocks were up 51%, with communication services gaining 38% and consumer discretionary adding 29%. In contrast, utilities and energy underperformed, with small gains of 0.5% and 5% each, while healthcare and consumer services ticked up just 3.6% and 2.5% respectively.

with developed markets. However, excluding China, emerging markets returned 20%, not too far off the tech-driven gains of developed markets. Indeed, most of the best performers in the year were emerging markets, including Poland returning 50%, Greece 46% and Mexico 41%. The underperformance of China, which was down 11.7% (offshore), was due to the country's unsteady economic recovery and deteriorating housing market, resulting in China's weight in the MSCI Emerging Markets Index plummeting to around 26% from 32% at the start of the year. In contrast, India's weight has more than doubled to 17% since 2020 and we believe it will continue growing on the back of strong fundamentals and continuing domestic retail investment. Most LatAm markets performed strongly, with Mexico up by 41%, Peru up 37%, and Brazil up 33%. India achieved 20% growth, while South Africa underperformed with a gain of only 2%. In Eastern Europe, we saw outstanding performance, with markets like Poland rallying 50% following the election victory of pro-market and pro-EU opposition, and Hungary up 49% due to consistently declining inflation and rate cuts. Greece also impressed in 2023, with a 46% return, driven in particular by restructured banks on the back of expected ROE improvement, robust underlying profitability and continued attractive valuations. In contrast, Turkey underperformed with a -11% return, although it rebounded towards year-end as the new economic team gained credibility in returning the economy to orthodoxy and attracting foreign investors.

Frontier markets underperformed developed countries but outperformed emerging markets, with a 12% return in 2023. Among the best performers was Romania, up a whopping 62% following several milestone achievements, including the USD 2bn IPO of Hidroelectrica and FID on the Neptun offshore gas project. Slovenia was another strong frontier European market, up 31%, while Kazakhstan recovered by 36%. The Middle East had a volatile end to the year due to the war in the region, although markets were quick to recover. For the full year, Dubai was up by 26% and Saudi Arabia rose by 18%, underpinned by solid PMI numbers, although Abu Dhabi and Kuwait corrected. In Africa, Egypt outperformed and was up 41%, while in Asia, Pakistan and Vietnam also showed healthy performance of 11% and 24% respectively.

Global commodities corrected by 13% during 2023. The drop was driven by a 26% decline in energy on the back of weaker oil (down 10%) and gas prices (down 56%). Base metals suffered from rising interest rates and the disappointing recovery in China, sending aluminium, nickel, lead, and zinc prices lower, with industrial metals declining by 14% overall. Precious metals saw a small gain of 5%, while gold outperformed at 13%. Soft commodities were a bright spot, posting 13% growth, with coffee and cocoa prices rising most.

General market comment

Outlook

Despite remarkably strong returns in 2023, we think 2024 should provide a more favourable and benign backdrop as interest rates start to fall in the US and even more so in emerging markets, especially in countries such as Mexico and Brazil, which have some of the highest real rates in the world. Falling rates should also help bring about a slightly weakening USD, which is also typically a trigger for emerging market outperformance. While emerging markets, notably China, are currently undervalued and present a favourable risk-return profile, shortterm catalysts are uncertain, with geopolitical noise expected to increase leading up to the US presidential election towards the end of 2024. In China, a lot of the bad news is already priced in, so if the government does manage to start turning around the real estate sector by mid-year we would expect somewhat better performance than in 2023. The recovery of China's real estate market and potential rate cuts by the Fed could positively impact sentiment, making emerging markets an attractive investment destination due to stretched valuations and high earnings expectations in the US.

Despite these reasons for optimism, we are aware that 2024 is unlikely to be plain sailing. Our core investment approach has not altered, although as we moved through 2023, we sharpened our view of what 'company quality' means in the new normal of capital scarcity and volatility. Based on our core investment criteria, including structural growth, reasonable valuation and having an area where we are different from the consensus, we believe we have built portfolios of companies that will perform well regardless of economic backdrop, but especially if the risk appetite among global investors improves slightly, which is our base case.

East Capital Multi-Strategi

Management report

The Fund gained 2% during the year (in SEK). The net asset value was 177m SEK as of 31 December 2023, to be compared to 227m SEK as of 31 December 2022. Net outflows during the year amounted to 56m SEK.

The Fund's changes during the period

Multi-Strategy started the year with an allocation to equities of 62% and ended the year with an allocation to equities of 68%. Within equities, we held a balanced exposure mainly towards emerging markets in Asia and Eastern Europe. Within fixed income, exposure mainly consisted of corporate bonds with shorter duration and a limited exposure to long-duration.

The Fund's risk exposure

The Risk/Reward indicator presented in the Fund's KID shows the causality between risk and possible performance an investment in the Fund entails. The indicator is based on how the Fund's value has changed during the past 5 years. East Capital Multi-Strategi has been assigned a summary risk indicator (SRI) value of 3 which indicate medium low risk for both increases and decreases in value. The Fund's risk category can change as it is based on historical data and is not a guarantee for future Risk/Reward.

Investments in funds are always associated with risks. The Fund may both increase or decrease in value, and there is no guarantee that investors will recoup all of their invested capital. The primary risks are market risk, foreign exchange risk, liquidity risk, counterparty risk, operating risk and investment risk.

The Fund's liquidity risk may increase when portion of the fund is invested in instruments that could experience deteriorating liquidity during stressful market situations. Low liquidity can result in challenges or even impossibility to buy or sell instruments within a reasonable timeframe, leading to potential price deviations from expected levels.

The Fund's currency risk entails a risk for changes in underlying currencies in financial instruments the Management company trades in on behalf of the Fund. In countries where the Fund invests and where the currency deviates from the SEK the following applies:

- For equity investments, the foreign exchange exposure is not hedged

- For investments in fixed income instruments, the Management Company may hedge the foreign exchange exposure.

Other risks that can affect the value of the Fund are:

- Credit/Counterparty risk, the risk that an issuer or counterparty in a financial transaction cannot meet its obligations. The Fund invests in fixed income instruments e.g. bonds. If an issuer of such an instrument cannot pay the interest or the nominal amount the investment can lose parts of, or its whole value.

- Interest risk, the fund invests a significant part of its assets in fixed income instruments which are affected by market interest rates' general development.

- Operational risk, the risk of loss caused by operational functions, e.g. IT systems, management, depositary and administration.

- Investment risk, emerging markets: The Fund seeks, directly or indirectly exposure to companies and issuers located in emerging markets. Investors should be aware that these investments are connected with higher risk than investments in instruments from issuers in more developed countries. Investments in emerging markets can be volatile and illiquid and a fund's investments in such markets can be subject to delays in divestment. Also, there can be a higher risk of political, economic and social instability and negative changes in governmental policies and laws in emerging markets.

The Fund's assets can also be negatively affected by fluctuations in foreign exchange rate, currency controls and taxation.

Investments in derivative instruments may only be made for the purpose of protecting the value of the Fund's assets. Use of derivatives is not expected to affect the Fund's risk profile. The commitment risk approach is used to estimate the Fund's global exposure by measuring its exposure to the underlying assets in its existing derivative instruments.

Objective

The investment objective of East Capital Multi-Strategi is to provide a combination of long-term capital growth and interest income.

The Fund pursues risk diversification through active asset allocation and by investing, indirectly through fund units or directly, in equities and debt securities globally and will actively seek exposure to emerging markets to draw on the Management Company's extensive knowledge and experience in these markets.

Long term capital growth means the growth expected of fund investments over a period of five years.

Investment Policy of the Fund

The Fund will invest at least 30% and at most 80% of its assets directly in debt securities or indirectly through the use of UCITS or other UCIs which in turn invest in debt securities. The Fund will further invest at least 20% and at most 70% of its assets directly in equities and equity related securities or indirectly through the use of UCITS or other UCIs in equities and equity related securities.

Cash position can range between 0-50% of the Fund's net assets, however any higher allocation to cash is expected to be temporary, for example following larger inflows to the Fund or during extreme market conditions.

The Fund's investment focus is global and diversified and as such unrestricted in terms of industry, geography, sector and market capitalisation.

Emerging Markets are defined as countries not classified as developed by the recognised major indices, or which are considered as low or middle income countries by the World Bank.

Important Note

Pursuant to the Swedish Investment Fund Act (2004:46), East Capital Asset Management S.A. has been appointed to act as Management Company of the Fund.

Note: All performance figures in the management report are in SEK unless otherwise stated.

* The annual report and half year report of the Fund are available at the registered address of the Management Company.

<u>Change in value of fund units</u>		

Notes: Past performance cannot be used as an indicator for current or future performance. The performance data do not take into account the commission and fees generated each time fund units are issued and purchased. The reporting principles are available at the end of this report.

¹ Based on the end of year NAV.

² The Fund does not use a benchmark

³ Based on end of day prices.
⁴ Period from 10.08.2015 to 31.12.2015.

East Capital Multi-Strategi Special note to the Financial Statements as at 31 December 2023

Conflict in Ukraine

On February 24, 2022, the Russian Federation initiated a military conflict in Ukraine leading to closure of the Russian Stock Exchange on 25 February. As of this date the fund contained Russia and Russia related equity securities representing 3.16% of the portfolio. Due to the low exposure the Board of Directors of the Management Company decided not to suspend the determination of the net asset value and apply fair value pricing (see below – Valuation of Russian securities) for the relevant securities.

Valuation of Russia and Russia related equity securities

The valuation instructions for Russia and Russia related equity securities at the date of the Financial Statements are outlined below:

Classification – Statement of investments and other net assets (in EUR)	Condition	Instruction
Shares – Russia and Russia related (inaccessible)	Securities listed on exchanges domiciled in the Russian Federation	Value at last available price and apply an 99.99% valuation haircut
Shares – Russia admitted to trading on a local stock exchange listing (excluding Russian exchanges)	Depositary receipts or equity securities of companies domiciled and/or associated with companies domiciled in the Russian Federation, but listed on exchanges located outside the Russian Federation	Value at last available price of the equivalent local listing and apply an 81.50% valuation haircut

*Inaccessible is defined as securities which are currently not possible for the fund to trade over the local market of listing.

SFDR Disclosure

In accordance with the requirements of the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27th November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR") as amended and as complemented by regulatory technical standards (RTS), it is noted that for the Fund:

- East Capital Multi-Strategi

referred to under article 8, the required (unaudited) RTS annex to the periodic report is presented on the pages at the end of this report.

Management Company

Depositary

Skandinaviska Enskilda Banken (publ)

Supervisory authority

The Fund(s) are authorised in Sweden and regulated by the Swedish Financial Supervisory Authority, Finansinspektionen. East Capital Asset Management S.A. is authorised in Luxembourg and regulated by the Luxembourg supervisory authority, *Commission de Surveillance du Secteur Financier* (CSSF).

Legal Status of the Fund(s)

The Fund(s) are mutual funds pursuant to the Mutual Funds Act (Swedish Code of Statutes 2004:46). The Fund(s) cannot acquire rights or assume obligations, but are represented by the Management Company.

Auditor

Mårten Asplund, Authorised public accountant KPMG AB. An agreement concerning the exchange of information and coordination has been entered into between the Fund(s) auditor and the Master Fund Company's auditor.

Reporting principles

This Annual Report has been prepared in accordance with the Investment Funds Act (SFS 2004:46), the Swedish Financial Supervisory Authority's regulations on investment funds (FFFS 2013:9) and the Swedish Investment Fund Association's recommendations for the reporting of key performance indicators pertaining to investment funds

The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received are deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as the Fund(s) may consider appropriate in such case to reflect the true value thereof.

Securities admitted to official listing on an official stock exchange or traded on any other organised market are valued at the last available reliable price on such stock exchange or market, unless such a price is not deemed to be representative of their fair market value.

The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are valued in accordance with market practice

Fund Shares/Units in undertakings for collective investment in transferable securities ("UCITS") are valued at the latest price determined and obtained from the Master Fund. Both unrealised and realised profits and losses are reported in the

The Fund(s) holdings in shares and other financial instruments have been valued with prices taken at 22.00 CET.

* Assets and liabilities are reported at their fair value.

Term definitions

Active risk (tracking error), as reported in this annual report, describes how much the total return of the Fund(s) deviates from the return of its benchmark index. It is an indication of how active the manager has been, where a high value is an indication of active management and a low value is an indication of passive management

Active share is to give the investors an understanding of the activity of a specific fund and should be seen as a complement to the key ratios, for example tracking error and return comparisons against a benchmark.

The turnover rate is a measurement of the proportion of the Fund(s) which is traded over a period of time. It indicates how short or long-term the management perspective is by reflecting the length of time that a security remains part of the Fund(s). It is calculated by adding all purchases and sales respectively for a given period and then dividing the lowest total by the average of the Fund(s) assets under management

Ongoing charges is total costs excluding transaction costs, expressed as a percentage of the average of the Fund(s) assets under management.

Total risk (standard deviation) is a measure of the fluctuations in the Fund(s) total return over a set period of time. The higher the value, the higher the risk.

Remuneration disclosure

Remuneration is set in accordance with East Capital's Remuneration Policy and applicable laws and regulation. A copy of the Remuneration policy is available on the East Capital Group webpage. No material changes were made to the Policy during the representation of the Policy during the during the reporting period.

Remuneration and benefits include e.g. cash salary and other cash remuneration, or instruments with the same characteristics as a mutual fund, pension provisions, severance pay or car benefits.

The implementation of the remuneration policy is regularly reviewed by an independent internal audit to ensure compliance with the remuneration guidelines and procedures established by the Board of Directors of East Capital Asset Management S.A. The latest review in 2023 did not show any significant shortcomings, but resulted in minor recommendations on the process and presentation of information in the annual report.

ECAM S.A.

Amounts in EUR, unless otherwise stated.

2023 Total full year remuneration*

	Employees in senior strategic positions	1,468.62
	Employees responsible for control functions	2,060.41
	Risk takers	0.00
Executive Management	Employees whose total remuneratuon amounts to, or exceeds, the total remuneration, to someone in executive management.	0.00
TOTAL - Executive Mo	3,529.03	
Other staff		1,470.97
TOTAL - All Staff		5,000.00

* Remuneration includes all fixed and variable remuneration and benefits from the fund company to an employee.

EAST CAPITAL

`ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: East Capital Multi-Strategi

Legal entity identifier: 529900HU0KNZU8HH6439

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social

characteristics promoted by the financial product are attained.

Did this financial product have a sustainable investment objective?

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and social characteristics promoted by this Sub-Fund were considered and addressed via our proprietary ESG analysis, which includes an ESG and SDG assessment. Environmental characteristics include, but are not limited to the reduction of greenhouse gas emissions and the transition to a Net Zero economy, improved energy efficiency and increased use of renewable energy sources. Examples of social characteristics promoted by this Sub-Fund include gender diversity, responsible supply chain management and protection of labour rights, and health and safety issues.

How did the sustainability indicators perform?

To structure the review of relevant and material ESG risks and opportunities promoted, the Investment Manager uses a proprietary ESG Scorecard which comprises a Red Flag Analysis and ESG related questions, some of which consider the principal adverse impacts (PAI) indicators. The ESG Scorecard also has an SDG module to assess revenue alignment with the UN Sustainable Development Goals (SDGs). The weighted equity average environmental and social score of the fund was 80,4 and 89,1 respectively. Moreover, the weighted average equity ESG score was 77,8 as of 31 December 2023. 26,3% of the Sub-Fund's NAV addressed at least one environmental SDG and 45,8% addressed at least one social SDG.

...and compared to previous periods?

The weighted equity average environmental and social scores of the fund improved by 18,4% and 17,2%, respectively, compared with last year's portfolio as of yearend 2022. Additionally, the weighted equity average ESG score improved by 17,2% during the same period. The Sub-Fund's contribution to at least one environmental and one social SDG increased by 10,8% and 87% respectively.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund intended to make included environmental objectives, such as improved energy efficiency, increased use of renewable energy, reduced greenhouse gas emissions and other environmental objectives as outlined in the UN SDGs. Social objectives included tackling inequality and strengthening labor relations and other social objectives as outlined in the UN SDGs.

The sustainable investments contributed to the environmental and social objectives by directly addressing any of the objectives in their operations, by enabling such activities, or by themselves being part of the transition through changing their practices and policies (for example, by reducing greenhouse gas emissions). The contribution to the environmental and social objectives are included and reflected in the proprietary ESG Score. Please refer to the Asset allocation section to see the proportion of sustainable investment for the Sub-Fund.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The Investment Manager ensures that any sustainable investments do not cause significant harm through the Red Flag Analysis, norms-based (controversy) screening, and sector-based screening, which are all part of the "Three-Step-Test" for defining sustainable investments. The Red Flag Analysis consists of a set of questions which the Investment Manager deems to be crucial to consider for ensuring that investments do not cause significant harm. The questions are related to corporate governance, ethics, and corruption, and also cover international norms and standards, as well as severe and/or systematic environmental or social controversies. The Investment Manager has introduced one question specifically addressing the Principal Adverse Impact (PAI) indicators, which are outlined in Annex I of Regulation (EU) 2019/2088. In order to assess the PAI indicators, the Investment Manager incorporates data from an external service provider that compares the PAI indicators for each company with a range of peer companies.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts are included in the Investment Manager's proprietary ESG Scorecards, which are completed by the Investment Manager and verified by the ESG function, and in the norms-based screening.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the controversy (norms-based) screening, companies are assessed in terms of compliance with international norms, standards and underlying conventions. The controversy (norms-based) screening is intended to capture severe, systemic and structural violations of international norms as enshrined by the UN Global Compact Principles. The assessments are underpinned by references to the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as well as their underlying conventions.

Upon new investment during the year, the Investment Manager confirmed the status of the new holding in regard to norms and controversies. The ESG function also verified the compliance of the Sub-Fund portfolio quarterly; this process highlights any company identified on the Watchlist or assessed as Non-Compliant. This review process is based on the results of the norms-based screening, information that has been publicly disclosed by issuers, as well as other relevant information that may have come to the attention of the Investment Manager. One company was considered non-compliant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Analysts and portfolio managers are responsible for considering PAI indicators when holistically assessing company quality and for answering the PAI-related question in the Red Flag Analysis, pre-investment. In case the PAI indicators are not available, analysts and portfolio managers are expected to make their best efforts to ensure that there are no unacceptably high risks related to principal adverse impacts on sustainability factors. The Sub-Fund considered principal adverse impacts on sustainability factors on a best effort basis given limitation in data availability.

What were the top investments of this financial product?

	Largest investments	Sector	% Assets	Country

describes the share of investments in specific assets.

Asset allocation

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

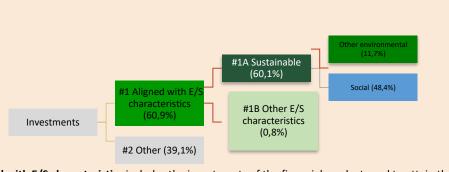

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the proportion of sustainability-related investments?

The proportion of Sustainable investment was 60,1% as of 31 December, 2023.

What was the asset allocation?

The proportion of investments aligned with E/S characteristics and Other, amounted to 60,9% and 39,1% respectively. The proportion of Sustainable investments and Other E/S characteristics amounted to 60,1% and 0,8% respectively. Moreover, the split between Other environmental, 11,7% and Social investments 48,4% was tilted towards sustainable investment with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

- The category **#1 Aligned with E/S characteristics** covers:
- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

NACE	Weights
Financial and insurance activities	42%
Manufacturing	18,5%
Wholesale and retail trade; repair of motor vehicles and motorcycles	9,7%
Electricity, gas, steam and air conditioning supply	6,5%
Information and communication	5,3%
Real estate activities	4,4%
Public administration and defense; compulsory social security	3,3%
Human health and social work activities	2,9%
Professional, scientific and technical activities	2,3%

Education	1,6%
Transportation and storage	1,2%
Mining and quarrying	1%

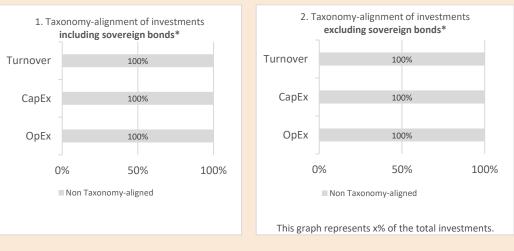

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Given the evolving methodology and lack of detailed disclosure, the Investment Manager assesses that the Sub-Fund does not have any alignment with the EU taxonomy. However, the investment approach is such that a certain proportion of the Sub-Fund was invested in companies whose activities do broadly align with the taxonomy. The broad alignment amounted to 4% as of 31 December 2023. The broad alignment is not expressed in the chart presented in the section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

turnover reflecting the share of revenue from green activities of investee companies.

capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable. The Investment Manager did not assess that any investments were made in transitional or enabling activities, partly due to the evolving methodology and lack of detailed disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy amounted to 11,7%.

What was the share of socially sustainable investments?

The share of socially sustainable investments amounted to 48,4%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash positions necessary for ancillary liquidity. Furthermore, investments included under "other" are investments the Investment Manager classifies as not sustainable or as aligned with E/S characteristics, where there is a very compelling investment rationale to do so and/or companies that were not covered by an ESG analysis. Assets included under "other" were 27 instruments involved in activities related to financial and insurance activities, real estate activities, electricity, gas, steam and air conditioning supply, information and communication, public administration and defence, wholesale and retail trade, repair of motor vehicles and motorcycles, professional, scientific and technical activities and manufacturing.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager engaged with a Chinese smart device and mobile internet service provider during the reference period. Our efforts included: requiring TCFD-aligned disclosure, promoting board diversity and advancing gender diversity, enouraged UNGC signaotry status, establishing a sustainability committee at the board level and introducing sustainability-linked KPIs.

investments with an environmental

objective that **do** not take into

sustainable

account the criteria for environmentally

economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark for the purpose of attaining environmental or social characteristics.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark? Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
